The Habit Forming Guide to Becoming a Systems Thinker

An accessible and hands-on guide to applying systems thinking to education, business, leadership, parenting, citizenship and much more.

“Systems Thinking takes your students to a whole other level of learning, and it hits so many standards all at once because it’s applicable to literally everything you do in the classroom. Lessons that I’ve been teaching for years and years have truly been enhanced through systems thinking: I saw better results in their reading, I saw better results in their math, and I knew it was because they were thinking in a different way.”

— Anna Geras, Elementary School Teacher

This book will deliver benefits to any individual who wants to make a difference—now and in the future.

WRITTEN BY PRACTITIONERS WITH OVER 20 YEARS EXPERIENCE APPLYING SYSTEMS THINKING

Tracy Benson, Ed.D. is a leader of the Waters Foundation Systems Thinking in Schools Project, serving as President of the Systems Thinking Group. Her 30+ years of experience in preK-20 education include teaching at all educational levels, school administration, professional development, and research.

Sheri Marlin, M.Ed., is a national consultant with the Waters Foundation Systems Thinking in Schools Project and also heads a project that is working to examine the role of systems thinking as an innovation to create more relevant and engaging learning experiences for all students.
